

B-CALPHOS oral liquid

Liquid complementary feed to strengthen bone and egg shell

- ✓ Prevents Mineral Deficiencies
- ✓ Increase Egg Production
- ✓ Improves Egg Shell Quality
- ✓ Strengthens The Bones
- ✓ Enhance Growth & Productions

B-CALPHOS

oral liquid

Composition per liter:

Phosphorus	92 800 mg
Calcium	15 000 mg
Choline Chloride	82 500 mg
Magnesium	9 000 mg
Sodium	5 500 mg
Manganese	10 800 mg
Zinc	10 000 mg
Iron	9 700 mg
Copper	2 500 mg

Minerals play a critical role in the metabolic function of poultry & livestock. Calcium is the main component of the bone structure and participates in acid-base balance and enzymatic system. Phosphorus is a component of organic compounds involved in energy, carbohydrate, fats and amino acid metabolism, blood chemistry and lipid transport, phosphorus functions as a constituent of bone.

Indications:

B-CALPHOS is indicated to prevent mineral deficiencies in all types of animals. It improves the egg production and growth in poultry and improve egg shell quality. It prevents bone weakness in birds and animals. It stimulates milk production in mammals.

Administration: (All animals)

1 ml per 2-4 liters of drinking water during 3 to 5 days. B-CALPHOS will be especially effective in young animals and at the start of the laying - or milking period.

Storage:

Store in a cool place, protected from light.

Presentation:

5 litre
