

B-VIT SEL oral liquid

Complementary feed to stimulate the immune system

- ✓ Improves FCR
- ✓ Enhances reproduction
- ✓ Boosts immunity
- ✓ Prevents anaemia
- ✓ Reduces Stress

B-VIT SEL

oral liquid

Composition per liter:

Vitamin E (α -tocopherol acetate)	200 000 mg
Selenium (sodium selenite)	50 mg

Vitamin E (α -Tocopherol)

- A lipid soluble antioxidant. It works as a first line of defence against peroxidation of vital phospholipids.
- Inhibits the production of prostaglandin-which suppresses cellular immunity. Vitamin E plays a role in antigen recognition, cell response and membrane repair.

Selenium

- is an important component of selenoproteins, one of these is glutathione peroxidase that works as a second line of defence, destroying peroxides before they can attack. Other selenoproteins are: Selenoprotein W, Sperm Capsule Selenoprotein, Iodothyronine Deiodinases and Thioredoxin Reductase.

Indications:

Dietary vitamin E with selenium (Se) is indicated for improvement of body weight gain, feed consumption, feed conversion efficiency, leukocyte migration inhibition and antibody production.

Administration:

Poultry: 1 ml B-VITSEL per 10 liters of drinking water during 5 consecutive days.

Other animals: 1 ml per 20 kg body weight.

The application can be repeated after one month, if necessary.

Storage:

Store in a cool place, protected from light.

Presentation:

5 litre
